CoRoute

Pre-launch · November 2026

Ride together, come home safe.

The safety and coordination app for India's motorcycle riders, solo and in groups. The phone the rider already carries becomes a crash detector, an SOS beacon that works without signal, and a group radio. No extra hardware.

The problem

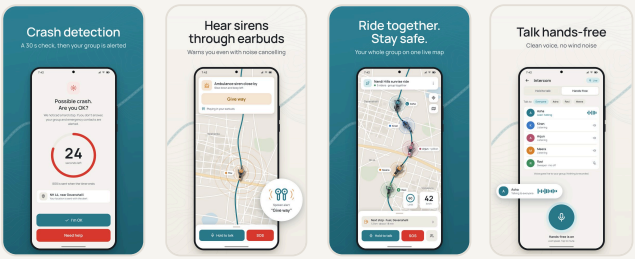

1,72,890
road deaths in India, 2023 [1]

44.8 %
were two-wheeler riders, the highest share [1]

- A solo crash depends on a passer-by; dead zones on ghats and highways stop calls.
- Group rides run on WhatsApp: location expires, separate bubbles, no roles, no SOS, nothing without data [2].
- Riders in noise-cancelling earbuds or helmet sets often can't hear an ambulance.

Why now

- **85.5 %** of Indian households own a smartphone, with the sensors crash detection needs [3].
- **19.61 M** two-wheelers and **12.25 M** motorcycles dispatched in FY2025 [4]; Royal Enfield sold over **1 M** motorcycles in FY2025 [5] and its One Ride 2025 drew **150,000+** riders [6].
- Indian group-ride apps compete on community and planning; none we found ships crash detection, offline SOS and live voice together.

What CoRoute does that others don't

Crash detection, 30 s check
"Possible crash. Are you OK?" No answer sends the SOS. Suppresses potholes, speed breakers, rough road and loose phones; learns per bike.

SOS without signal
Text from the rider's phone, text from the server to emergency contacts, and a phone-to-phone relay between nearby riders.

Siren alerts for ANC earbuds
The phone's mic recognises ambulance, police and fire sirens and says "Keep left and give way" in the rider's ears.

Live hands-free intercom
Push-to-talk or hands-free over mobile data, wind and breath cleaned up; relayed live, never recorded.

Guardian live link
Family follow the ride in a browser, no app needed; first name and position only; ends on its own.

Privacy by design
Encrypted in transit; no ads; no trackers; no sale of data; routes deleted after 90 days.

Business model

- **Safety free for every rider**, in every plan and mode.
- **Group plans**: one host pays, everyone joins free. Sold only on the website (Google Play payments policy).
- **Access modes** switchable in the web admin: Paid · Free for everyone · Free up to limits.
- **Operators and clubs (B2B)**: approved web console with roster, rides, live map, attendance.
- **Later**: partner perks, insurance safe-rider certificate, fleet safety.

Status

- Android app and gateway code-complete (v3.55; 3.56 adds web payments, access modes, operator console).
- 904 / 904 server tests at the last full run (Nov 2026); 66 admin feature switches, safety core locked on.
- Two Oracle Cloud VMs with live failover; website live at coroute.devmonks.space.
- **Next:** real-device validation, Google Play launch, iOS. No users or revenue yet.

The ask: [OWNER TO FILL] amount, instrument, use of funds and the 12-month milestones it buys. · **Contact: [OWNER TO FILL]** founder name, e-mail, phone.
