COROUTE · **OPERATORS & PARTNERS**

Support and Escalation

How operators reach CoRoute, what to expect, and what to do in an emergency.

Version: CoRoute 3.56 · November 2026

Rule number one

> **In any emergency involving injury or danger to life, call 112 first.** For an ambulance you can also call 108. CoRoute does not dispatch emergency services and does not monitor your rides. Contact CoRoute only after the emergency services have been called.

1. How to contact CoRoute

Channel	Use for	Details
Business e-mail to CoRoute support	Account, limits, features, billing, data requests, incident follow-up	[OWNER TO FILL: support e-mail]
Website: Contact and feedback page	General questions, feedback	Link in the CoRoute website footer
Operator escalation line	Urgent console or platform problems during a live ride	[OWNER TO FILL: phone / WhatsApp business number and hours, or "not offered"]
Your application page (/operators/apply)	Status of your application, rejection reason	Shown on the page

Please include:

- your organisation name;
- the owner's CoRoute username;
- the ride name and the time (IST);
- what you saw (a screenshot of the console, with any SOS dialog closed);
- the error message or code shown.

Do **not** send riders' medical info or emergency-contact numbers by e-mail unless CoRoute asks for them in a specific case.

2. Severity levels and response targets

Level	Examples	First response target	Update cadence
S1: Safety-critical	Live map or SOS banner not working during a live ride, riders unable to raise or receive an SOS (after calling 112 if anyone is in danger)	[OWNER TO FILL]	[OWNER TO FILL]
S2: Ride-blocking	Cannot start a ride on ride day, invites not arriving, console down	[OWNER TO FILL]	[OWNER TO FILL]

Level	Examples	First response target	Update cadence
S3: Account	Limit increase, feature request, renewal, suspension query, co-organiser problem	[OWNER TO FILL]	[OWNER TO FILL]
S4: General	Questions, feedback, report export questions	[OWNER TO FILL]	n/a
Privacy or data	Suspected misuse of rider data, data breach, rider data request	[OWNER TO FILL: e.g. same day]	[OWNER TO FILL]

These are targets, not guarantees, until they are agreed in your Operator Terms.

3. During a live ride: escalation path

1. **Someone hurt or in danger? → Call 112.** The lead or sweeper stays with the rider (see *Ride Organiser SOP*, section 4).
2. **The console does not show the ride or the SOS**:
   - the riders' app still works without the console. SOS, crash alerts, emergency texts and group alerts run on the riders' phones and CoRoute's servers;
   - ask the lead to check the ride in the app (riders' list, incident card);
   - reload the console. If you were signed out, sign in again;
   - if the problem continues, contact CoRoute at S1 (section 1).
3. **A rider's emergency contact is not shown**:
   - check that your plan has "Roster & emergency contacts during an SOS";
   - the rider may not have saved a contact ("No emergency contact saved.");
   - the riders on scene can use the app's incident card and the rider's lock-screen medical info.
4. **After the emergency**: write down the times and actions. If you need CoRoute's records, for example the alert time or the audit of contact views, request them at S3 with the ride name and time.

4. Account problems

Situation	What you see	What to do
Limits reached	e.g. "Your plan allows 12 rides a month; 2026-11 is full."	Ask CoRoute for a change (S3). See the error table in the *Operator Console Manual*.
Feature missing	"<feature> is not part of your plan."	Ask CoRoute to add it (S3).
Account expired	Banner "This operator account expired on <date>..."	Ask CoRoute to extend it (S3). Reports stay readable.
Account suspended	"Account suspended" with the reason	Contact CoRoute (S3). Live rides keep running.
Console turned off	"The operator console is turned off for now."	This is temporary. Live rides are not affected. Check CoRoute's notices or contact CoRoute.

5. Rider complaints and data requests

- When a rider asks you about their data, refer requests about CoRoute's data to CoRoute support. Handle requests about your own copies (for example exported CSV files or incident logs) yourself. See *Data Processing Note (DRAFT)*.

- A rider can always leave your club on /clubs or in the app.
- Report suspected misuse of rider data, or a breach, to CoRoute **without undue delay** [OWNER TO FILL: e.g. within 24 hours].

6. What CoRoute may ask you

- The CoRoute usernames involved, the ride name and times.
- Whether 112 or the police were called, and when (for incident reviews).
- Confirmation that you have deleted exported data when it is no longer needed.

Emergency numbers in India: 112 (all emergencies), 108 (ambulance). CoRoute is a safety aid, not an emergency service.
